## EXPERIENCE

### SDE Intern

June 2024 – Present

*Remote / Mumbai*

*Infiheal*

- Engineered high-performance full-stack web applications using the **MERN stack and Next.js**, handling concurrent user traffic with **99.9% uptime** and ensuring data consistency.
- Architected containerized microservices using **Docker**, reducing production image size by **60%** (via multi-stage builds and Alpine bases) to optimize deployment velocity.
- Spearheading the 'HealoAI' mobile application development using **Flutter** and **Bloc architecture**, achieving **90% code reusability** for shared logic and enhancing UI responsiveness.

### Full Stack Developer (Freelance)

May 2024 – Sept 2024

*Self Employed*

*Remote*

- Collaborated with a team of 5 developers to deliver 3 robust web applications, translating complex client requirements into technical specifications.
- Optimized frontend rendering performance by implementing code-splitting and lazy loading, reducing First Contentful Paint (FCP) by **30%**.
- Designed and deployed scalable REST APIs, ensuring secure data exchange and low-latency responses for diverse client use cases.

## PROJECTS

### Portfolio Builder | *Next.js, Typescript, React Templates, Git/GitHub, Gemini, Tailwind CSS*

Nov 2025 – Present

- Built a no-code web application that enables users to create professional portfolio websites in minutes by simply uploading their resume.
- Integrated AI-powered resume parsing using Gemini to automatically extract and populate portfolio content, with ready-to-use templates and one-click publishing capabilities.

### Google Drive Clone | *Next.js, Tailwind CSS, AppWrite, MongoDB*

Jan 2025 – March 2025

- Architected an efficient document management platform with categorized sidebars, powerful search functionality, and real-time collaboration tools.
- Implemented role-based security and seamless document updates to enhance team productivity..

### Summarizer-CLI | *Node.js, LLMs APIs, NPM*

Oct 2024 – Jan 2025

- Developed an NPM CLI tool utilizing GenAI APIs to instantly summarize code files and generate documentation directly from the terminal.
- Streamlined the code review process for developers, reducing documentation time by approximately **50%** through automated syntax analysis and summarization.
